

46. b. 21.
A DIRECTION FOR
the English
TRAVILLER

By which he Shal be inabled to Coast
about all England and Wales.

And also to know how farre any Market or noteable
Towne in any Shire lyeth one from an other, and whether
the same be East, West North, or South from y.^e Shire Towne
As also the distance betweene London, and any other Shire or
great towne: with the scituation thereof East, West, North, or South
from London.

By the help also of this worke one may know (in what
Parish, Village, or Mansion house, soever he be in)

What Shires, he is to passe thorough &

which way he is to travell.

till he come to his

Journies
End.

Infelix cuius nulli Sapiencia prodest.
Are to be Sold by Mathew Simons at
the golden Lion in Duckelaine, 1586.

Jacob van Langeren sculp:

The use of all the
insueing Tables.

To know the distance betweene any two Cities or Townes in any of theis Tables. seeke the places desired in the Upper & side Catalogues of Townes. and direct yo^e eye from either place betweene the lines both from aboue and from the side. and where the lines meete in square you shall finde the number of miles. ffor Example, if you would know how farre Lincolne is from Exiter, looke in the card^{ff}shire Townes and finde Lincolne in the side and carrie yo^r eye directly from thence betweene the lines untill it come vnder Exiter. and where they meete in square you shall finde 178. w^{ch} is the distance of miles. If you finde any towne in the side w^{ch} will not extend to make a square wth the desired towne aboue, then looke for the Towne w^{ch} you finde in the side, in the vpper pt & the vpp. part in the side:

For Example

If you desyre to know the distance betweene Gloucester and Oxford, if you looke Gloucester in the side, you cannot bringe Oxford in a square wth Gloucester but if you looke Gloucester aboue and Oxford in the side you shall finde the square and the distance 35 miles and soe of the other ensueing Tables

To know whether you are to trauell East, West, North or South, from the place where you are to the place whither you intend to goe, & through what Shires you must passe

Look^e in the small mapp of England placed before the great table of Shire townes and draw a streight line from the next

The use of all the
insueing Tables.

To know the distance betweene any two Cities or Townes in any of theis Tables. seeke the places desired in the Vpper & side Catalogues of Townes. and direct yo^r eye from either place betweene the lines both from aboue and from the side. and where the lines meete in square you shall finde the number of miles. ffor Example, if you would know how farre Lincolne is from Exiter, looke in the cardffshire Townes and finde Lincolne in the side and carrie yo^r eye directly from thence betweene the lines untill it come vnder Exiter. and where they meete in square you shall finde 178. w^{ch} is the distance of miles. If you finde any towne in the side w^{ch} will not extend to make a square wth the desired towne aboue, then looke for the Towne w^{ch} you finde in the side, in the vpper pt & the vpp. part in the side:

For Example

If you desyre to know the distance betweene Gloucester and Oxford. if you looke Gloucester in the side. you cannot bringe Oxford in a square wth Gloucester but if you looke Gloucester aboue and Oxford in the side you shall finde the square and the distance 35 miles and see of the other ensueing Tables

To know whether you are to trauell East, West, North or South, from the place where you are to the place whither you intend to goe. & through what Shires you must passe.

Look^e in the small mapp of England placed before the great table of Shire townes and draw a streight line from the next

Shire towne lying in yo^r way to that Shire towne w^{ch} is next
the place whither you desyre to goe and you shall immediately see
whether your Journie be East, West, North, or South, and what
Shires the line brings you through those Shires you must passe.

As for Example.

If you would trauell from London to Yorke, you will perceiue
by the mapp that it lyeth North from London then draw a line
or carrie yo^r Eye streight from London to Yorke and you shall
finde the way lyeth through Middlesex, Hartfordshire Hunt-
ingtonshire, Northamptonshire, Lincolneshire, Notingham
shire, and Yorkeshire, and soe for any other place.

Againe to know what market townes lie in your
way which way soeuer you trauell.

When you haue seene in the generall mapp what Shires you
are to passe thorough obserue whether you must passe through
the middle or the skirts of ech Shire then turne to the tables of
those Shires and at the foote of ech of them you shall haue a
mapp wherin the townes are signified as they lye in every Shire
by the first letter of every towne, and if you must passe through
the middle of the Shire then the letters about the middle of the
mapp declare the Townes by w^{ch} you must goe, but if thorough
the skirts of the Shire then the letters in the skirts of the mapp
are yo^r direction.

The Market Townes in every table
are distinguished from the rest by greate letters, and the letter
for y^e Shire townes hath a crosse on the topp to distinguish it from the other
